SUPTO MOHAMMAD SABUR ISLAM KHAN

Senior Angular Developer

Dhaka, Bangladesh • +8801620531802 • suptokhan24@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Angular specialist with 5+ years building production-grade, scalable Angular applications end to end — from UI architecture and component design through complex state and API integration. Singlehandedly designed and built a 46+ module in-house Angular Learning Management System from the ground up, and led an Angular + Ionic hybrid mobile strategy that cut mobile development cost by 80% while shipping native Android/iOS apps from a single Angular codebase. Career built entirely on Angular, from first front-end role to lead Angular developer.

PROFESSIONAL EXPERIENCE

Software Engineer (Remote) | LawSikho

New Delhi, India • 2022 – 2026

Key Achievement: Singlehandedly architected and built LawSikho's core in-house Learning Management System — 46+ modules — in Angular, end to end: from UI-to-markup conversion through full functionality, optimization, and production deployment.

Angular LMS Ownership

- Owned the flagship in-house LMS as sole Angular developer across 46+ modules, converting designer mockups to markup and implementing full front-end functionality — one of 25+ Angular projects delivered at LawSikho.

Hybrid Mobile Strategy (Angular + Ionic)

- Proposed an Angular + Ionic hybrid build in place of hiring a dedicated Android developer; architected the Angular app structure and requirements, then directed a subordinate developer through implementation — cutting mobile development overhead by 80% while maintaining full feature parity with the web platform.

Angular Dashboards & Front-End Delivery

- Student Journey Portal: built an end-to-end Angular dashboard tracking the user lifecycle from registration through payment and course completion, improving retention transparency.
- Student Onboarding: built an automated Angular onboarding flow introducing new students to the platform and course structure.
- Revenue Tracking Dashboard: built a historical Angular reporting UI aggregating course-sales data — transactions, offers, and totals — with filterable views for the sales team.
- Job Portal: built the Angular front-end for a high-traffic employment platform (Glassdoor-style) connecting recruiters with legal talent.

Angular Performance & Workflow Optimization

- Optimized the Angular-based Student Management and Revenue Tracking dashboards — reducing report generation time by 70% and automating financial reconciliation workflows by 40%.

Front-End Developer | Omicron IT LTD.

Dhaka, Bangladesh • 2020 – 2022

Key Achievement: Progressed from HTML/CSS implementation to lead Angular developer within the first few months, taking end-to-end front-end ownership of an Angular-based e-commerce platform for an Austria-based client.

- Joined with HTML, CSS, and JavaScript only — the first front-end role of my career; converted designer UI mockups into markup for the client's Angular-based e-commerce platform (a multi-vendor storefront with 36+ vendor accounts) [confirm platform name/spelling and vendor count before sending].
- Trained into Angular after ~2-3 months and became the platform's main Angular developer, owning every requirement end to end: design conversion → HTML/CSS → Angular implementation → QA/testing → production release.
- Collaborated directly with Austria-based stakeholders using Jira and Kanban for requirement gathering, including sprint meetings, and contributed independent recommendations on UI/UX decisions.
- Orchestrated Angular development across a distributed team spanning three time zones (US, Australia, Bulgaria) delivering enterprise web solutions.
- Developed modular, responsive Angular applications with Bootstrap; enforced strict coding standards and component reusability.
- Implemented Test-Driven Development for Angular components using Karma and Jasmine, significantly reducing production bugs and regressions.
- Integrated complex RESTful APIs, geolocation services, and HTML5 browser storage within Angular applications to build dynamic, location-aware experiences.

ANGULAR & FRONT-END SKILLS

- **Angular:** Angular (Expert, 5+ yrs) — component architecture, services, routing, forms (Reactive/Template-driven), directives, pipes, dependency injection, RxJS
- **Hybrid Mobile:** Ionic, Capacitor — Angular-based native Android/iOS app delivery
- **Core Web:** TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap
- **Testing:** Jasmine, Karma — unit testing and TDD for Angular components
- **Integration:** RESTful API consumption, Firebase, geolocation services, HTML5 browser storage
- **Workflow:** Agile/Scrum, Jira, Kanban, Git/GitHub, Postman, Cursor/Claude Code for Angular development

EDUCATION

- B.Sc. in Computer Science & Engineering — Northern University Bangladesh (2021 – 2024)
- Diploma in Computer Technology — Munshiganj Polytechnic Institute (2015 – 2019)
